

GenuTrain A3
Knee Support

SecuTec OA
Knee Brace

KNEE OSTEOARTHRITIS PATIENT GUIDE

Get a physician to examine you at the first signs of recurring knee problems. There are a range of treatment options available to help manage symptoms associated with knee OA. Common modalities include increasing moderate physical activity, weight loss, physical therapy and medication.

Knee braces and other supportive devices such as cushioning gel insoles help relieve pain and provide joint stability. Injections (visco-supplementation) are commonly used for more severe knee OA. Surgery may be required if other treatment options don't succeed.

Talk to your doctor and learn more what Bauerfeind brace solutions and GenuTrain OA can do for you.

GenuTrain OA
Knee Brace
